Hurdles with JO Platforms V1

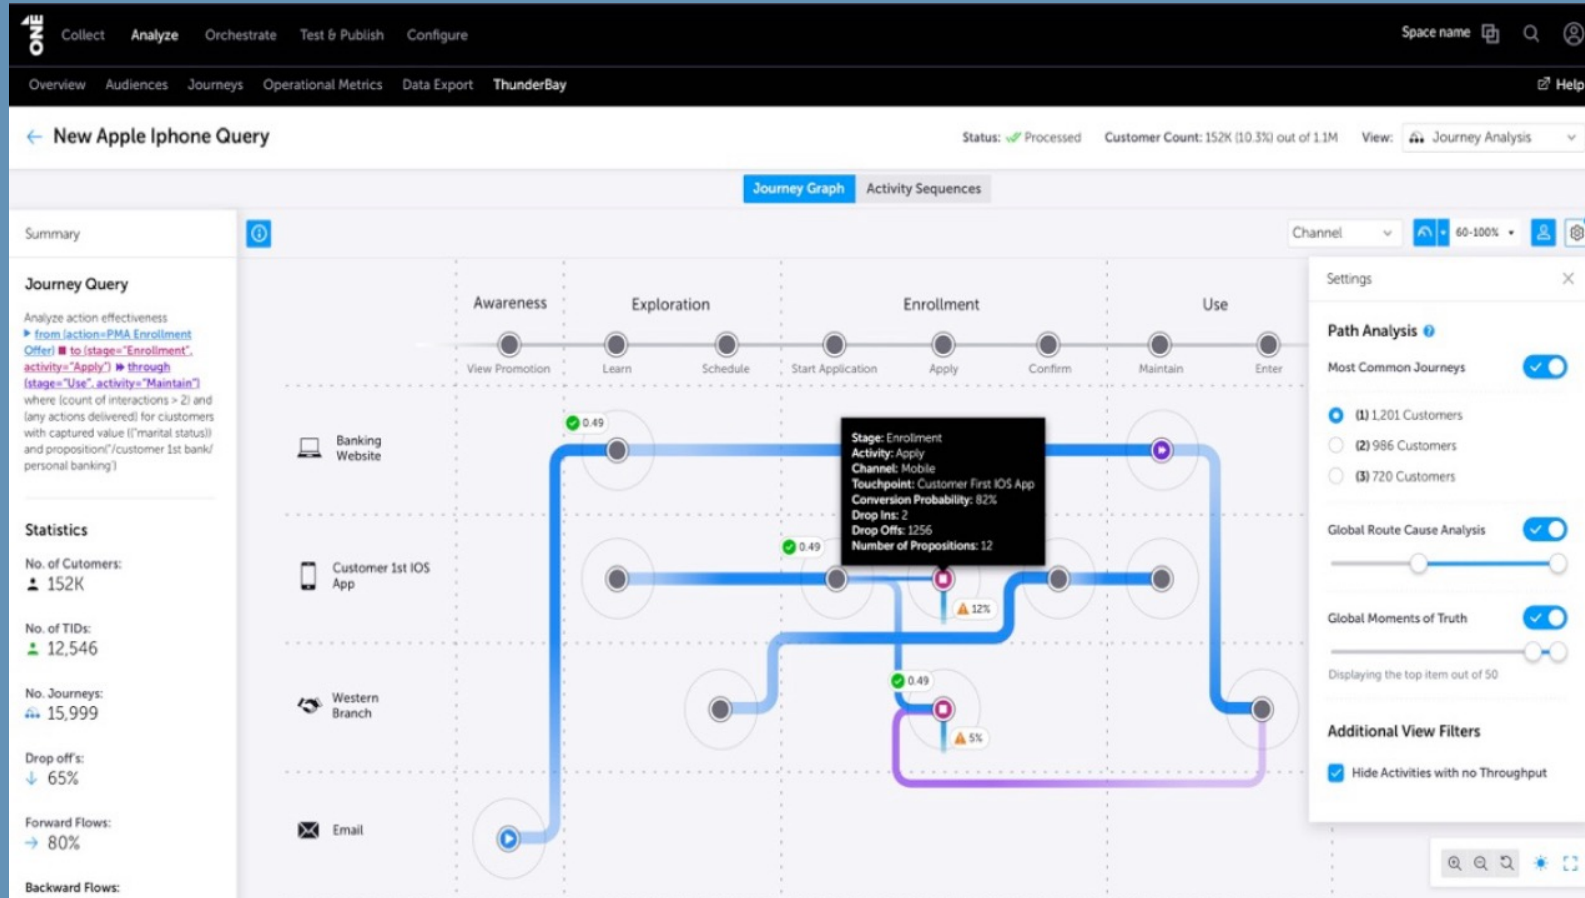

JO V.1 Called Some Maturity Questions

This sh1t is *hard*...

- Enterprise governance
- Instrumenting journey listening
- Breadth of scope
- Customer data availability
- Technical integration chops
- Internal skill sets
- Program management

1) Dedicated JOE Platform

Pros

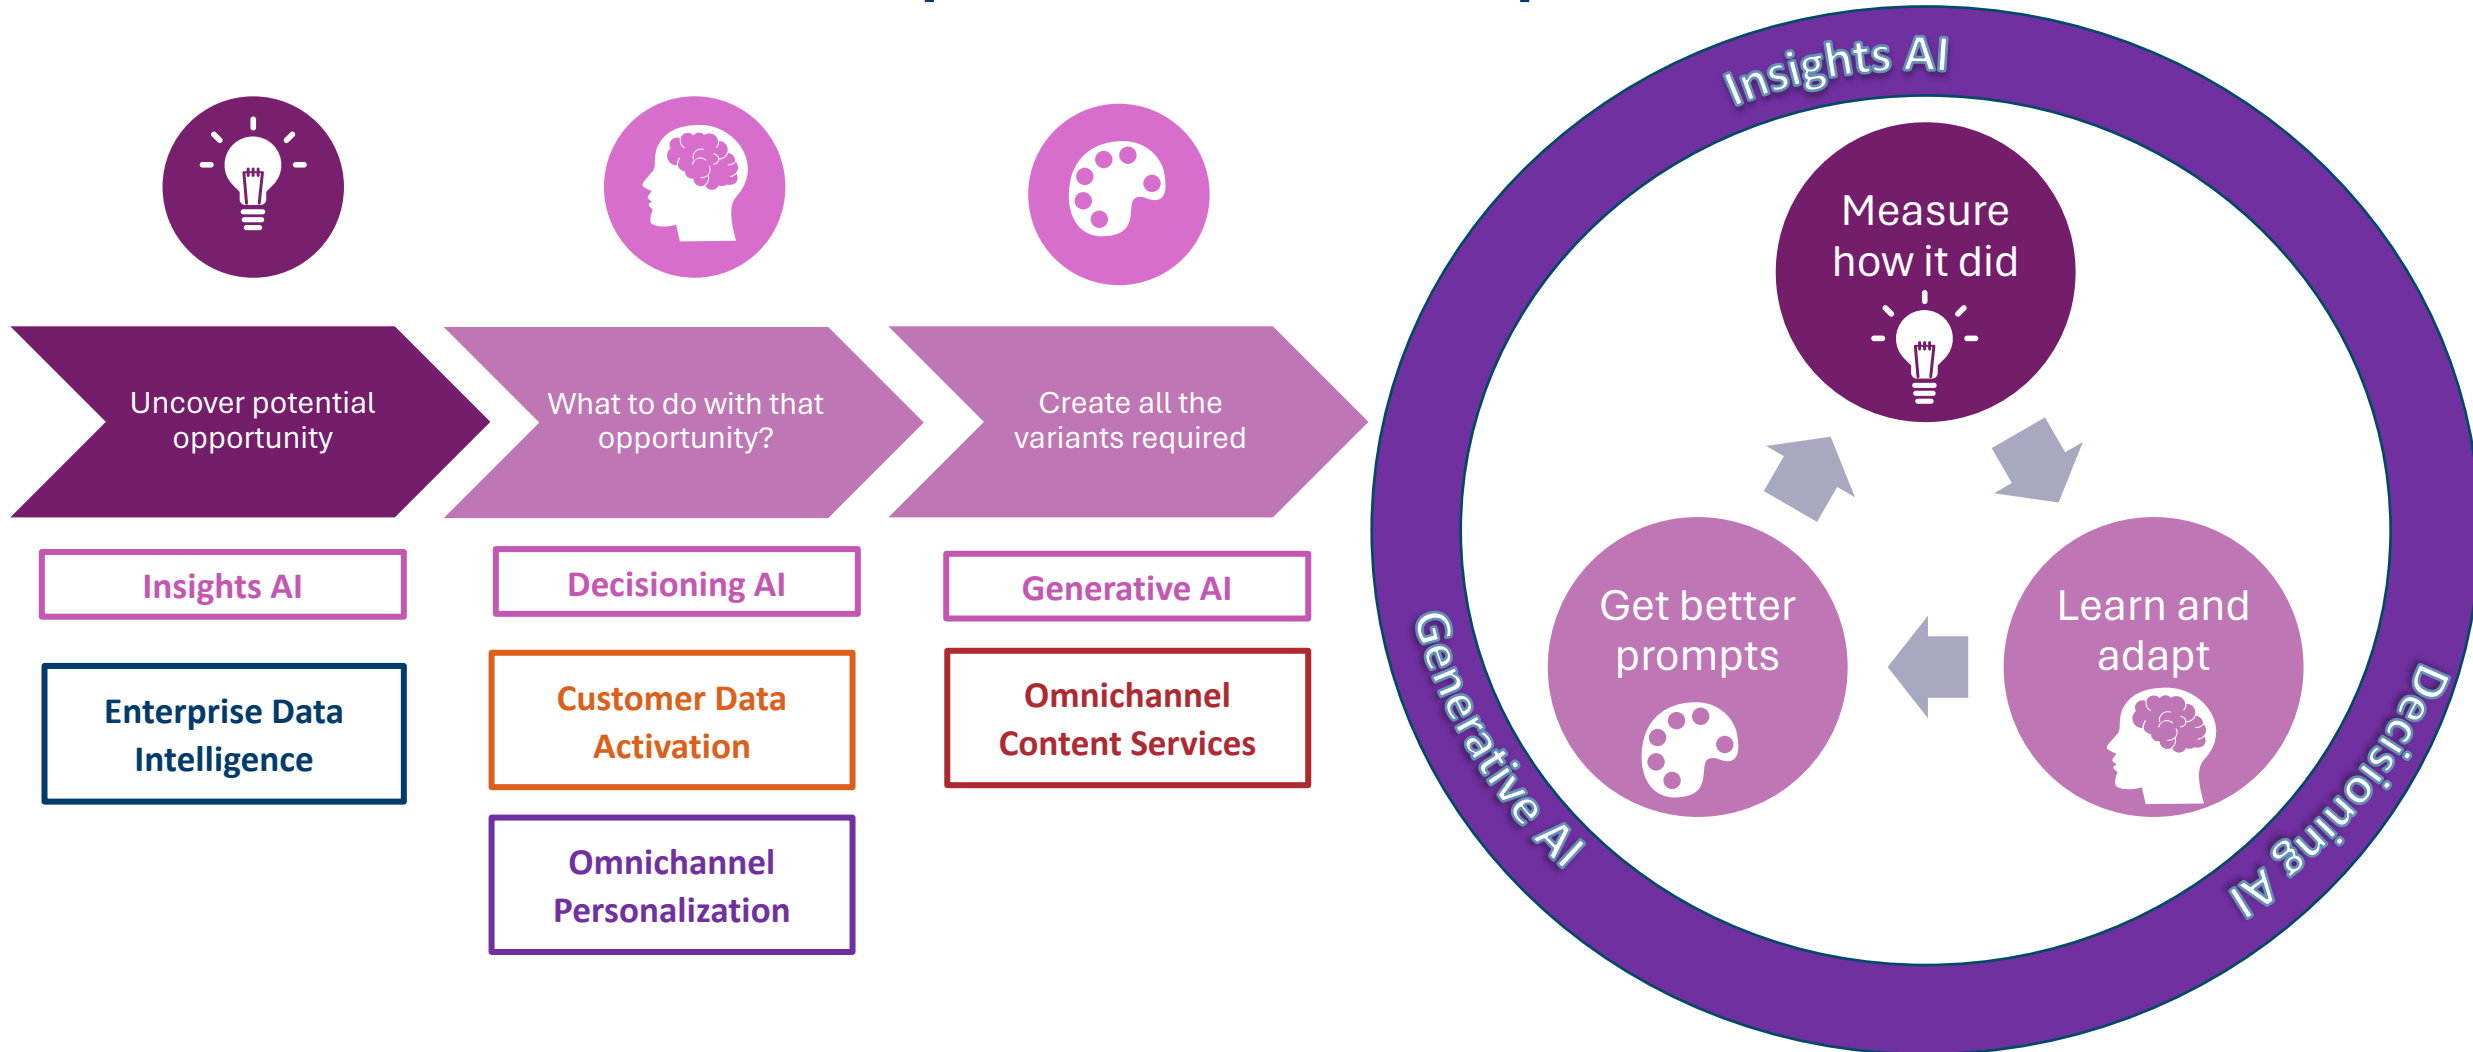

- Comprehensive capabilities with a best of breed solution
- JOE independent of other components, so you can scale it on its own

Cons

- Marketplace and solutions not very mature; questions of scale and robustness
- Requires a *lot* of integration with downstream systems
- JOE will almost surely need CDP; or provide its own (likely weak) CDP-ish capabilities
- Managing decision logic gets arduous over time

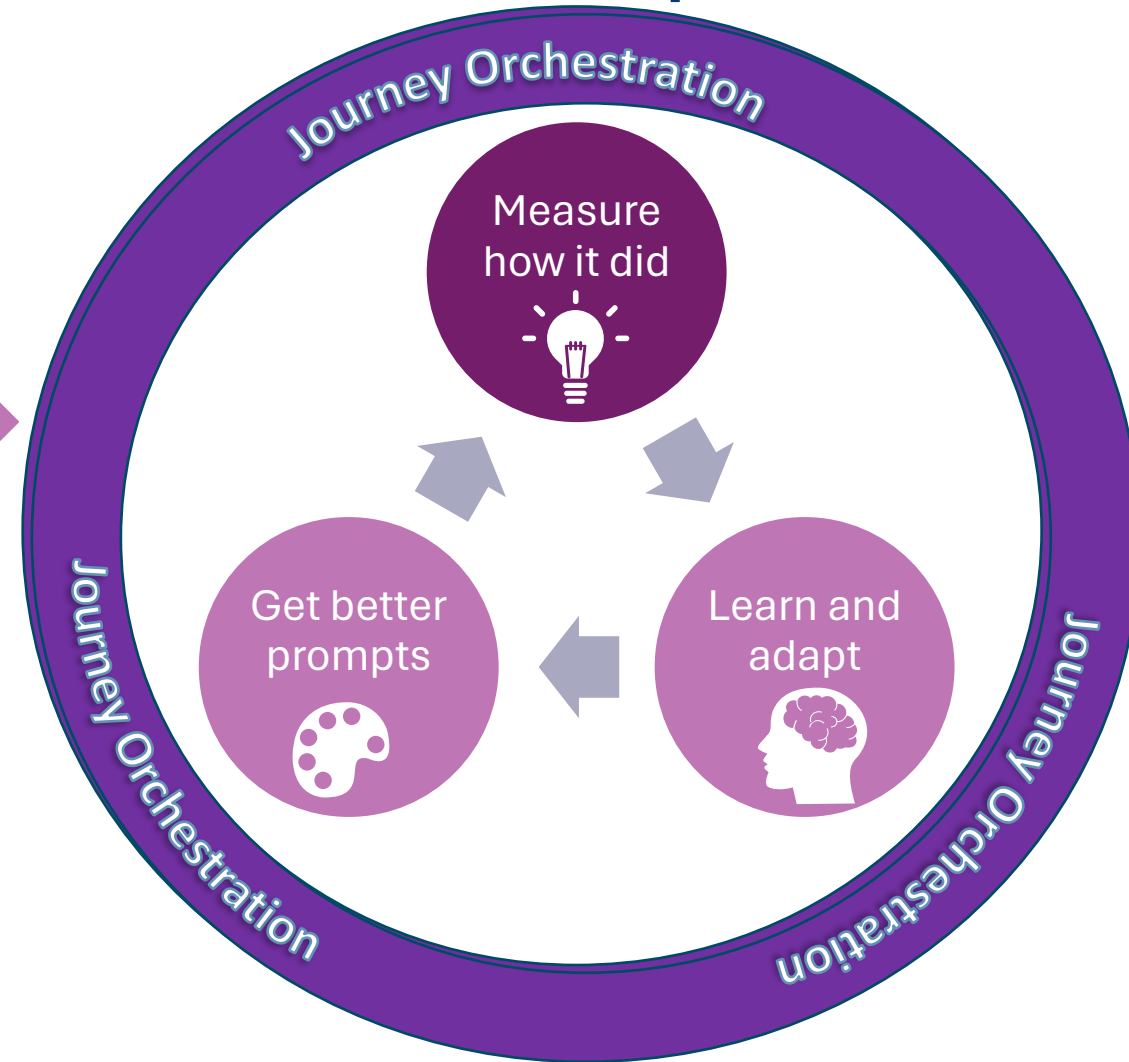

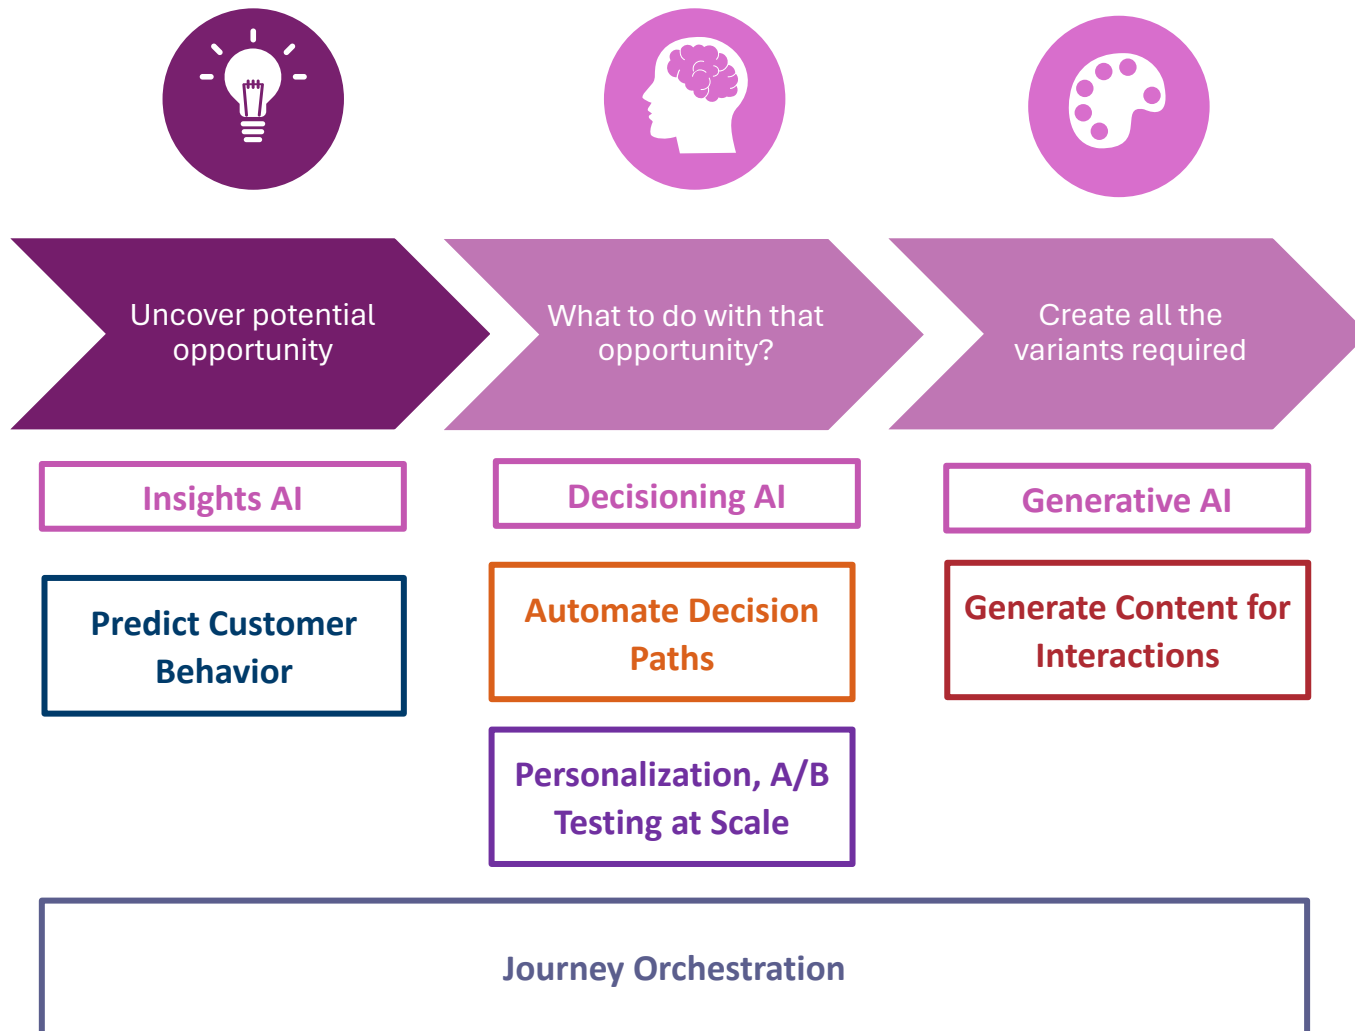

AI + JOE V2
